

CARP Audio

Take Control of your Audio

At CARP Audio we're driven by a passion for audio and digital signal processing, offering cutting-edge software tools designed to empower music creators. Our plugins stand out with their unique concepts, fast workflow and efficient algorithms. We focus on reducing the steps between your musical ideas and their final outcome, allowing you to focus on what really matters: your music.

Our commitment to creating Unique Music Production Tools means every tool we design is made to offer something new to the world of music production. We think outside of the box and transform non-standard or new/innovative audio manipulation techniques into an intuitive, effortless experience.

Body Shifter

\$110⁰⁰

'Shift the Body, Not the Pitch!'

'Body Shifter is a special plugin that allows users to shift the body of their individual elements independently from its pitch. This makes it possible to reposition the energy distribution of any sound within the frequency spectrum.

Krossbow

\$89⁰⁰

'A new kind of Dynamics Processor'

Krossbow is the dynamics processor you've been waiting for. Set your Maximum Reduction and watch as your sound is getting ducked towards it, preserving the natural dynamics while boosting impact.

APM Live

\$59⁹⁵

'The Universal Automatic Pitch Mod Wheel'

At its core, 'APM Live' is a Universal Mod Wheel using a polished Time-Stretching Algorithm for modulating pitch in Realtime. Sit back and watch as APM Live analyzes your sound, automatically moving the Mod Wheel for you.

Octopus

\$34⁹⁵

'The Ultimate Octover'

Meet Octopus. It makes your sounds more unique and huge. It has easy sliders for introducing the time-stretched versions of the source, up and down an octave, plus built-in High/Low pass filters, Special-Detune and Spread for that big sound.

Resonote

\$59⁹⁵

'Unleash the Musical Potential of Resonances'

Resonote, at its core, is a Note-based Resonator and tuned Soft-Distortion plugin in one. It gives the opportunity to make every sound fit into your melody or chord structure, giving body and character that perfectly suits your music's vibe.

Load your own Impulse Responses!

Reeferb IR

\$49⁹⁵

'The Dynamic Convolver'

Load Impulse Responses from your IR collection or experiment with random FX samples, hear the convolved signal getting added to your audio dynamically, filling up the empty spots with unique texture.

Reeferb

Free

'The Automatic Reverb Automation Tool'
Are you tired of spending endless hours fine-tuning your reverb automation to achieve that perfect balance in your audio productions? Look no further than our new plugin 'Reeferb', the game-changing audio plugin that simplifies the complex art of reverb automation with unparalleled precision.

Mono Pusher

\$24⁹⁵

'Dynamic Mono Conversion'

Mono Pusher dynamically ducks your sound to mono. By harnessing the peak information from the stereo channels it delicately modulates/ducks the side channel, making your source dynamically gain center presence.

Bundle Available for

\$49⁹⁵

Stereo Pusher

\$29⁹⁵

'Dynamic Stereo Field'

Stereo Pusher dynamically ducks the mid channel separate from the side channel, dynamically altering your stereo-field. i can be used for all sorts of stuff. Transient Designing, De-Essing, Vocal Compression, Stereo Enhancing. But it uses this core technique to dynamically shape your stereo field with it.

All Plugins One Purchase

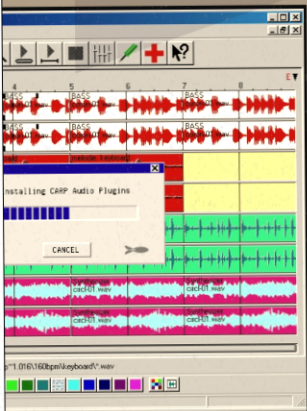

\$249⁰⁰

'The Complete CARP Audio Bundle'

A complete toolkit of creative precision, built to streamline your workflow and spark inspiration. From pitch manipulation to spatial shaping, every plugin is engineered for intuitive control and killer sound.

Why pick and choose when you can have it all? Get every CARP Audio plugin for only \$249 - a massive deal compared to the \$450+ total value if bought separately.

One-time purchase. Lifetime updates. No subscriptions.

Body Shifter

Shift the Body of your Sounds without Pitching!

NEW

Body Shifter is an innovative spectral processing plugin that measures the Body of your audio and allows you to shift it independently from its pitch. This allows you to quickly reposition the energy distribution of frequencies, making it an essential tool for mixing and sound design. Whether you're shifting the body of percussion/drums to a different position in the frequency spectrum, reshaping vocals, or enhancing instrument character, Body Shifter offers an intuitive and entirely new way to sculpt your sounds effortlessly.

Traditionally, placing an element's tonality perfectly in a mix meant making static EQ or multiband saturation adjustments that didn't adapt as the sound evolved. Body Shifter, analyzes the body of your audio in real-time and allows you to shift it with a simple turn of a knob, effortlessly emphasizing certain frequencies or repositioning the body of an element somewhere else within the frequency spectrum.

“For years, audio engineers and producers have struggled with the limitations of static EQ'ing, Multiband Saturation and Pitch Shifting when trying to reposition the energy distribution of their sounds. Body Shifter eliminates these frustrations by addressing the core of the issue, delivering precise and effortless control over the body of the audio.

We wanted to create a tool that empowers producers to shape their sounds in ways that were previously impossible. This plugin is more than just an effect - it's a really new approach to mixing and sound design.”

-- Colin Hock, Founder & Developer
at CARP Audio

License Dashboard

After making your first purchase at CARP Audio, you'll gain access to your personal CARP Audio area, where you can view all your purchased plugin licenses, download the plugins, and copy the keys to activate your products.

License Dashboard

The dashboard is particularly helpful when setting up for the first time or configuring a new workstation, as it allows for quick & easy installation and activation of the plugins from one single location.
